Portfolio: <https://portfolio-deepj.netlify.app>

## Education

**Masters of Bussiness Admistration** 2024  
ICE (Mumbai, Maharashtra)

**Bachlors In Computer Science** 2022  
CMCS (Nashik, Maharashtra)

## WORK EXPERIENCE

### Unified Mentors - Internship ( September - December 2025)

Developed full-stack web applications using the MERN stack (MongoDB, Express.js, React, Node.js). Built and enhanced projects such as a Gym Management System, real-time chat application

### Bdx Data Centers - Internship ( February - August 2025)

Worked on internal technology projects, contributing to a finance dashboard using Python and MySQL for data analysis and reporting. Supported web development tasks using HTML, CSS, JavaScript, PHP, and React, and assisted in building a React Native-based emission tracking application for data centre operations. Gained hands-on experience with real-world enterprise systems and cross-functional collaboration.

## Projects

### Chat Application (Real-Time Web Application)

Technologies: HTML, CSS, JavaScript, Node.js, Socket.IO

Developed a real-time chat application enabling instant one-to-one and group communication using WebSocket technology. Implemented secure user authentication, dynamic user presence indicators, and live message delivery without page refresh. Designed a responsive, modern UI with a dark theme to enhance usability across devices. Built RESTful APIs for user management and integrated Socket.IO for real-time messaging, typing indicators, and online/offline status.

Key Highlights:

- Real-time messaging using Socket.IO
- Secure authentication and session handling
- Responsive and user-friendly UI

GitHub repository: <https://github.com/deeptijoshi01/real-time-chat-application>

### Clinic Management System (Web-Based Application)

Technologies: PHP, HTML, CSS, JavaScript, MySQL

Designed and developed a comprehensive Clinic Management System to streamline daily clinical operations. The system supports patient registration, appointment booking, doctor scheduling, and medical record management. Implemented role-based access control for admin, doctors, and staff to ensure secure data handling. Integrated a MySQL database for efficient storage and retrieval of patient records and appointment data. Focused on creating a clean, intuitive interface to improve workflow efficiency and reduce manual paperwork.

Key Highlights:

- Patient, appointment, and medical record management
- Role-based access control for secure operations
- MySQL-based relational data management
- Improved clinic workflow and reduced administrative effort

## SKILLS

- JavaScript
- Html
- CSS
- React.Js
- PHP
- Python
- SQL
- MongoDB
- Bootstrap
- Tailwind CSS

## ABOUT

I am a Frontend Developer with a strong foundation in building responsive and user-friendly web applications using HTML, CSS, JavaScript, and React. I have experience developing dynamic interfaces, integrating APIs, and implementing role-based views across projects such as a real-time chat application and a clinic management system. I am passionate about clean UI design, performance optimization, and continuous learning, and I am seeking an opportunity to grow and contribute as a Frontend Developer in a professional environment.

## Recent Certifications

Full stack Development
