WORK EXPERIENCE

Data Analyst Trainee Sunrion Pharma	Aug 2025 – Mar 2026
- Collaborated on 5+ internal projects involving debugging, data validation, and backend logic support. - Automated data processing workflows using Python to improve consistency and reduce manual effort	
Research Analyst Intern Mirania Data Systems	Aug 2023 – Jan 2024
- Identified consumer trends and competitor patterns using Python, improving decision accuracy by 20% - Created Power BI dashboards from Python-processed data to visualize and monitor key metrics	

GITHUB PROJECTS

Blog Management REST API (FastAPI)	Live Website
- Built and deployed a RESTful blog API handling CRUD operations with secure JWT authentication - Designed database models using SQLAlchemy with migrations and query filtering for data retrieval	
CRM Web Application (Django)	Github
- Developed a Customer Relationship Management Application with user authentication and dynamic views. - Designed relational database models to manage leads and related entities using Django ORM.	
Real Estate Research Assistant (GenAI – RAG)	Github
- Developed a GenAI-powered research assistant using LangChain and ChromaDB for RAG-based retrieval - Implemented document ingestion and pipelines, enabling 30% faster and accurate query responses
