

Siddhesh Santosh Kale

Email: siddhesh.sa.kale@gmail.com | Contact no. 9326417949

Location: Nashik ,India

Aspiring management professional with a background in AI & Data Science with 1.5+years of experience in cloud computing and Linux systems, aiming to combine technical knowledge with strategic thinking, team leadership, and business management skills.

Technical Skills

Operating Systems: Linux Server, Bash Shell, Windows OS

AWS Cloud Services: EC2, IAM, VPC, Lambda, S3, RDS, CloudWatch

Project Management Tools: Jira, Slack.

Tools & Data Handling: MS Office, Excel, Power BI

EXPERIENCE

APSC Infotech & Software Solutions Pvt Ltd.

(Sept 2025 – Feb 2026)

Linux System Administrator / Technical Support Engineer

- Managed end-to-end infrastructure for global clients ensuring high availability and SLA compliance improved reliability and client satisfaction.
- Bridged clients and technical teams translating requirements into solutions ensured timely and aligned project delivery.
- Oversaw hosting platforms (cPanel/WHM, Plesk) managing domains, DNS, email, and databases maintained smooth operations.
- Handled server and application troubleshooting (Apache, Nginx, PHP, MySQL/MariaDB, MSSQL, IIS) resolving critical issues minimized downtime.
- Managed email services (SMTP, IMAP, POP3) fixing routing, spam, and delivery issues improved communication reliability.
- Monitored server performance (CPU, RAM, disk, load) proactive issue resolution optimized system performance.
- Implemented security measures (CSF, firewall, access control) protecting infrastructure reduced security risks.
- Supported enterprise production systems ensuring backend stability enabled continuous operations.

Arrow Technology and Solutions

(Feb 2024 – July 2024)

Cloud Computing and Network Intern

- Managed AWS cloud projects and client interactions, understanding business requirements and designing secure, scalable solutions ensuring alignment between client needs and technical delivery improved client satisfaction and solution efficiency.
- Implemented and monitored cloud infrastructure (IAM, CloudWatch, VPC) in secure environments maintaining system performance and visibility reduced risks and ensured high availability of services.
- Led virtual network projects with client involvement using Cisco Packet Tracer designing secure and optimized network architectures delivered reliable and well-structured network solutions.
- Applied network security practices (VLANs, port security, routing) ensuring controlled and secure communication enhanced system security and performance stability.
- Handled troubleshooting and performance optimization across cloud and network systems resolving issues proactively minimized downtime and improved overall system reliability communication.

Education

- Sandip Institute of Technology and Research Centre (SITRC), Nashik, India. (2021-2025)
B.E Artificial intelligence and Data Sciences
Final Year 2025, Score - SGPA :- 9.05 CGPA : 7.61 FIRST CLASS
 - M.S.S.T Jr Collage (HSC), Dombivli, India. (2021 Batch)
12th Science:- 82.17%
 - Dawan Breakers School (SSC), Nashik, India. (2019Batch)
10th: -68.80%
-

PROJECT

YOLO Based Smart PPE Detection

- Led the end-to-end development of a real-time PPE detection system understanding project requirements, analyzing safety challenges, and coordinating with the team delivered an high-accuracy solution achieving 92% mAP and recognition at the final-year exhibition.
- Collaborated with team members to design and implement the solution using YOLOv8 and OpenCV enabling real-time video analysis and detection ensured accurate and efficient monitoring of safety compliance.
- Developed real-time alerting and visualization features addressing workplace safety needs enhanced usability and practical application of the system.

KUMBHATHON STARTUP FESTIVAL

- Led a team during Kumbhathon Startup Festival 2025 (Nashik, Jan 4–6), managing guest arrangements and coordinating end-to-end event operations to ensure seamless execution.
- Collaborated with organizers, handled real-time challenges, and maintained smooth program flow, earning recognition for dedicated volunteer leadership and operational excellence.

AI-Powered Image Recognition Using AWS Cloud

- This project builds a serverless AI-powered image recognition system using AWS cloud services. It enables users to upload images, analyze their content using Amazon Rekognition, and store metadata for quick retrieval.

CERTIFICATE

AWS Certified Solutions Architect – Associate

Certification by Amazon Web Services | Comprehensive knowledge of AWS services and architecture.
