Portfolio: [website link](#) | GitHub: [github profile](#)

Career Objective

AI-focused Full Stack Developer with expertise in building intelligent, scalable applications using modern web technologies and AI systems. Skilled in Prompt Engineering, Agentic AI workflows, and real-time systems. Passionate about developing automation-driven solutions that improve business efficiency and user experience.

Academic Qualification

GRAPHIC ERA UNIVERSITY, Dehradun, India Master of Computer Application(MCA)	7.04CGPA	Aug 2023 to June 2025
B.D college, Patna Bachelor of Computer Application(BCA)	61.8%	Jun 2019 to Mar 2022
Raghunath jha Collage, Sitamarhi Higher Secondary Certificate (Science)	76.8%	Apr 2017 to Aug 2019
M.S.A.R High school, Sitamarhi	76.6%	Mar 2017

Projects

Portfolio Website: Personal portfolio website ([adityarishi.in](#)) showcasing projects, technical skills, and experience in building modern, secure, and user-friendly web applications.

Project Title: Secure Chat Application

Summary:

Developed a real-time chat application with end-to-end encryption to ensure secure communication. The application is built using modern web technologies, providing a seamless user experience with high performance and robust security. .

Project Title: Inventory Management System (IMS)

Summary:

Developed a web-based inventory management system to track products, sales, and stock levels for a small business. The application allowed users to manage products, view stock levels, and generate sales reports. Built using JavaScript, HTML, CSS for the front end, and Node.js with MongoDB for the back end. The system improved business efficiency by reducing manual tracking errors and saving time in managing inventory and sales.

Skills and Certification

- **AI & Automation:** Prompt Engineering, Agentic AI, LLM Integration (OpenRouter/Gemini/ollama), AI Chatbots, Workflow Automation
- **Project Management:** Agile methodologies, sprint planning, resource management, cross functional team leadership.
- **Software Implementation:** Software deployment, integration, troubleshooting, and user training for efficient software adoption.

- **Technical Skills:** React.js, Node.js, MongoDB, SQL, HTML, CSS, JavaScript, WebSocket, Socket.IO, JWT
- **Problem Solving & Analytical Thinking:** Strong analytical skills for troubleshooting issues and optimizing software performance.
- **Communication & Documentation:** Effective communicator for technical and non-technical stakeholders; skilled in creating implementation documentation.
- **Tools & Platforms:** GitHub, Microsoft Office Suite (Word, Excel, PowerPoint).

Extra -Curricular Activities

- **Volunteer Web Development** – Assisted in developing and implementing websites for local non-profit organizations, gaining hands-on experience in coding and problem-solving.
- **Tech Club Member** – Actively participated in university tech club events, workshops, and hackathons, expanding knowledge in software development and collaborative project management.
- **Online Coding Challenges** – Regularly participated in coding competitions (e.g., on platforms like HackerRank or LeetCode) to enhance problem-solving and algorithm skills.
- **Project Management Role in College Events** – Led a team to organize and implement various college events, learning time management, teamwork, and leadership skills.
- **Tech Blog Contributor** – Wrote articles on software development trends and tutorials, improving communication skills and keeping up with industry trends.
