PROFILE:

Full Stack Developer with 4 years of experience in web and software development, specializing in scalable, responsive applications using PHP and modern frontend technologies like React JS.

EDUCATION:

B.R.A. Bihar University,
BACHELOR OF COMPUTER APPLICATION

Muzaffarpur, BIHAR, INDIA, March 2022

TECHNICAL SKILLS:

- **Development:** Full Stack Developer
- **Web Technologies:** HTML5, CSS3, JavaScript, Bootstrap
- **Libraries:** React.js
- **Backend Development:** PHP
- **Database:** MySQL
- **Version Control:** GitHub
- **IDEs & Editors:** VS Code, Sublime Text
- **Local Development:** XAMPP, WAMP
- **Package Managers:** npm
- **File Transfer:** FileZilla

PROFESSIONAL EXPERIENCE:

Ardent Computech Pvt. Ltd. Kolkata, India

- Full Stack Developer

March 2023- Present
- Delivered 10+ full-stack web applications using PHP with a 90% on-time delivery rate, meeting client specifications and deadlines.
 - Facilitated client requirement gathering through direct meetings, translating business needs into technical specifications and project plans.
 - Collaborated with cross-functional agile teams of 5–7 members, reducing delivery cycles by 15% through streamlined sprint planning and code reviews.

- Engineered secure and scalable back-end systems using PHP, focusing on high-performance server-side logic and clean code architecture.
- Developed responsive, cross-browser compatible front-end interfaces using React.js, Redux, and Bootstrap, HTML, CSS ensuring seamless user experiences across devices.
- Built admin dashboards with role-based access control, activity logs, and data analytics modules for business insights.
- Designed and implemented efficient data synchronization between front-end interfaces and back-end PHP services for a seamless user experience.
- Implemented secure authentication and authorization systems session management ensuring compliance with security best practices.
- Handled server-side validation, error handling, and exception logging, improving system stability and debugging efficiency.
- Automated routine server tasks and database maintenance using Corn Jobs, reducing manual effort by 50% and ensuring timely data processing.

PROJECTS:

Role: Full Stack Developer

Indian Institute of Chemical Engineers Project

- University website with an integrated management system for content and student/faculty management. [Link](#)

Advances in Chemical and Materials Sciences (ACMS)

- Developed a dynamic and responsive website for the ACMS platform, enabling users to explore recent research in chemical and materials sciences. Integrated features include paper submission, event schedules, committee details, and real-time updates. Admin panel supports content management. [Link](#)

Centre for Education Innovation and Entrepreneurship

- Developed a comprehensive Administrative Dashboard using PHP and MySQL to dynamically manage multinodular content including Members, Industry Collaborations, and Research data with full CRUD functionality and secure authentication. [Link](#)

ICLED 2026 Conference Website | Centre for Education Innovation and Entrepreneurship

- Developed a dynamic conference management website using PHP and MySQL with a fully functional admin panel. Implemented content management features using CKEditor to allow real-time updates across all frontend pages. Built dynamic modules including Keynote Speakers, Plenary Speakers, Early Career Sessions, and Organizing Committee with database-driven content rendering. Designed responsive UI and ensured seamless user experience across devices. Integrated authentication and structured backend logic for efficient data handling and scalability. [Link](#)

ICRETBS 2026 Conference Management System

- Developed a dynamic Conference Management System using PHP, MySQL, Bootstrap, JavaScript, HTML, and CSS. The application includes a role-based admin panel with secure authentication and authorization for managing conference-related activities. Implemented modules for abstract submissions, publication management, speakers, committees, awards, conference schedules, and website content management. Built file upload and document management functionality for abstract and full-paper templates. Integrated dynamic frontend pages with MySQL database for real-time content updates and developed complete CRUD operations through the admin dashboard. Designed responsive and user-friendly interfaces to ensure seamless administration and content management across the platform. [Link](#)
