MERN Stack Developer with 2.5+ years of experience building and deploying production-grade web applications for real clients. Proficient in React, Node.js, MongoDB, JWT authentication, and RBAC. Delivered live e-commerce and client platforms, optimized APIs with 30% performance gains, and solved 400+ DSA problems. Passionate about writing clean, scalable code and shipping impactful products.

Skills

Languages :	C++ JavaScript TypeScript SQL
Frontend :	React.js Next.js Redux Toolkit Tailwind CSS Bootstrap HTML CSS
Backend :	Node.js Express.js REST API Development JWT Authentication Mongoose
Databases :	MongoDB MySQL
Tools & Platforms :	Git GitHub Postman VS Code Docker AWS S3 Netlify Vercel Render Figma jsPDF
Concepts :	RBAC CI/CD SSR MVC Architecture State Management Performance Optimization

Work Experience

Software Developer

Jan 2024 – Present

Midbrains Technologies

- Led end-to-end delivery of client web applications using the **MERN stack**, owning the complete development lifecycle from requirements gathering, technical planning, and implementation through to production deployment.
- Optimized **RESTful APIs** and MongoDB schemas, improving response time by **30%** through query tuning and indexing.
- Collaborated directly with clients to define technical specifications and consistently shipped features within sprint deadlines.
- Maintained production applications ensuring uptime, monitoring performance, and resolving critical issues proactively.
- Secured applications with **JWT-based authentication** and **RBAC**; integrated **payment gateways** (Razorpay/Stripe) and **cloud storage** (AWS S3).

Software Developer Intern

Jul 2023 – Dec 2023

Midbrains Technologies

- Built reusable **React** components and integrated REST APIs, reducing frontend development time across projects.
- Enhanced backend features using **Node.js** and **MongoDB** following MVC architecture principles.
- Improved application stability through testing, debugging, and deployment support in a production environment.

Client Projects

Janki Enterprises – MERN E-commerce Platform

www.jankienterprisesupri.com

[Live Link](#)

- Built a complete, scalable full-stack e-commerce platform using the **MERN stack** with advanced product management, **real-time** order tracking, and secure user authentication.
- Developed a feature-rich **admin dashboard** with automated invoice generation, and seamless print/edit functionality for efficient order management.
- Actively maintain and improve the application in a **live production** environment, ensuring high performance, security, and reliability.

Gold House

www.goldhousedss.com

[Live Link](#)

- Developed a fully responsive client website using **HTML, CSS, JavaScript, and Bootstrap** with modern animation libraries for smooth transitions and an engaging user experience.

Maa Mamta Enterprises – Campa Cola Distributor Platform

www.maamamtaenterprises.com

[Live Link](#)

- Built a **POS system** with A4 invoice PDF generation (multi-logo, amount in words, paid/pending tracking) using **jsPDF**.
- Developed a **analytics dashboard** with MongoDB aggregation pipelines for daily, weekly, and monthly revenue charts.
- Implemented **bill history**, cashier tracking, and real-time stock deduction on every POS transaction.

Projects

Smart Exam Platform

[GitHub](#)

[Live Link](#)

- Built a full-stack examination system using the **MERN stack** with secure authentication and **RBAC**.
- Created role-based dashboards for Teacher and Student roles with dynamic, context-aware functionalities.
- Optimized RESTful APIs and MongoDB queries for efficient, scalable data handling.

Education

Savitribai Phule Pune University

Jul 2019 – Jul 2023

Bachelor of Engineering in Information Technology

7.99 CGPA

Achievements

- Solved **400+ DSA problems** on CodeChef ([Profile Link](#))
- Solved **200+ problems** on GeeksforGeeks ([Profile Link](#))
